Individual Brainstorm

? **Question #1:** Describe your website subject in detail:

What do you already know about your social impact topic? (50+ words)

My social impact topic revolves around a proposed project in my home city which involves the development of a community center/sports complex within a vast, large well-known park, Liberty State Park in Jersey City, New Jersey. The proposed plan aims to enhance the park's open fielded functionality and accessibility for the local community, who call Jersey City home. This revolutionary plan involves a variety of community benefits, youth engagement, and economic development. Not only does this project have the potential to create a significant social impact, but it also aligns well with the community's priorities to be successful.

What do you still need to find out about your social impact topic in order to create a meaningful website? (20+ words)

I need to learn more about the discussions of major stakeholders regarding their reasoning for not pursuing the plan. Whether it's preserving the park's natural landscape, financial challenges, or just a conflict in interest within various stakeholders.

Who are the stakeholders involved with/affected by your social impact topic? ie children, people living in cities, politicians, CEOs, female-identifying persons (20+ words)

The stakeholders involved and affected by the social impact would be the residents including the children who live in Jersey City, sports enthusiasts (in favor of the project as

it allows JC to catch up to other towns in NJ in terms of sports development), environmental advocates, Government officials and policymakers, non-profit organizations, local businesses, park authorities, etc.

? Question #2: Describe your proposed website in detail:

What is the purpose of your website? (30+ words)

The purpose of the website is to inform about the proposed project plan. Users will be able to see some of Liberty State Park's development and improvement plans. Highlight the specific buildings/areas that advocate for improving and growing environmental, recreational, and community benefits. It aims to raise the awareness of locals in hopes of supporting the proposed plan.

Who is your intended user? (30+ words)

The intended users are residents, locals, tourists, and people who care about Jersey City. To add, the intended users also include major stakeholders including advocates and city officials who are interested in improving and developing the park.

How will your user interact with your website? (30+ words)

The user can look/swipe between different photos of the proposed plan. It will also include interactive maps and visualization of what's to come with this plan. Detailed information on the reasonings behind certain plans as well. Can also include videos of stakeholders talking about the plan, aiming to rally support for the proposed plan.

Wireframe

? When creating your wireframe, ask yourself:

- What about your topic do you want shared on your website?
- How do you want your content and website structured?

? Copy/Paste a screenshot of your wireframe or a link to it below (if using a link, make sure it is publicly viewable).
